

The American Heart Association's Garden Community is a collaborative online community where gardeners of all ages, skill levels, and garden settings (home, school, community, etc.) join to share knowledge, information, and expertise on gardening and garden-based education. Membership in the Garden Community is free and open to any person or organization interested in learning and collaborating about gardening.

As a member of the community, you will be able to:

- Access and contribute to an expansive library of garden resources:
 - Tips and techniques on planting and maintaining a garden
 - Information about various garden types and designs
 - Garden-based lesson plans and activities for children
 - Information about building an educational gardening program
- Share recipes, videos, and stories
- Participate in active discussions
- Browse ideas from outdoor classrooms and gardening programs across the country
- Enjoy camaraderie through the joys and more "innovative" moments of growing edible gardens with children

**Register today at gardencommunity.heart.org to get started in the community
and help us create a brighter, healthier future!**
